

**LOCK-OUT®**  
THE MAXIMUM SECURITY SCREW

# NEXT LEVEL ANTI-THEFT

A NEW UNIQUE DRIVE, HIGH TORQUE TAMPER-RESISTANT FASTENER

PATENTED & LICENSED DESIGN – MANUFACTURED  
IN THE USA UNDER ISO COMPLIANCE AND SOLD  
EXCLUSIVELY THROUGH TANNER

## WHAT IS LOCK-OUT®?

Lock-Out® is a new, innovative security fastener featuring a unique patented drive that is engineered to perform in **high torque** applications.

Lock-Out® is part of a patented system which prevents unauthorized access to bolted or screwed compartments using controlled access to driver bits.

## VARIETY OF OPTIONS AVAILABLE

Lock-Out® is available in a multitude of head styles, threads, diameters, lengths, materials, and finishes. Diameters range from 1/4"-5/8", M1.4-M16, and #0-#10, with lengths up to 12" for certain diameters. Materials available include carbon steel, stainless steel 302HQ, 304, 316, A286 & brass alloy steel 4037, 8740

**Installation Tools  
Are Not Sold  
Commercially.**

**LOCK-OUT®**  
Tanner EXCLUSIVE USA MASTER DISTRIBUTOR

## LOCK-OUT® FEATURES

- **High Torque** - tests prove that Parker's unique Lock-Out® elliptical design disseminates torque across the entire face of the drive at many different impact angles allowing greater torque.
- **Oval Center Pin** - inability to drill an oval hole thwarts theft.
- **Exclusive Custom Drives Available** - for absolute maximum protection of your property or product, Lock-Out® can be manufactured with a one-of-a-kind, drive pattern that is exclusive to your company.

## APPLICATIONS & INDUSTRY USES

Prisons	Military
Public buildings	Utility vaults / boxes
Schools	Municipalities
Agriculture	Mechanical compartments
Aerospace	OEM

## OUR MANUFACTURING PARTNER

Parker Fasteners is a premier ISO registered cold heading manufacturer located in Arizona, USA who sources all raw materials from American sources, including DFARS compliance.
